DESCRIPTORS Academic Achievement; Cognitive Processes; *Criterion Referenced Tests; *Educational Accountability; Educational Assessment; Elementary Secondary Education; *Functional Reading; *Program Evaluation; *Reading Skills; *Test Interpretation

IDENTIFIERS *Maryland

ABSTRACT

The 1973 statewide (Maryland) educational accountability plan, for which this report was compiled, called for the development and establishment of statewide and local goals in reading, writing, and mathematics; a comprehensive and uniform statewide testing program; procedures for collecting data on student, home, community, and school characteristics; and a method whereby school systems would report test results and other information to the state. This report, an appendix to the functional reading test results for the school year 1975-76, consists of school level tables that record by county the percentage of students achieving competency in the skill categories and on the total test. Another table records the community and public school resources according to grade organization, total school enrollment, pupil/staff ratio, average daily attendance, personnel, experience, staff educational level, and the background of the school-age children.
